# 1. Login Process

## Public User

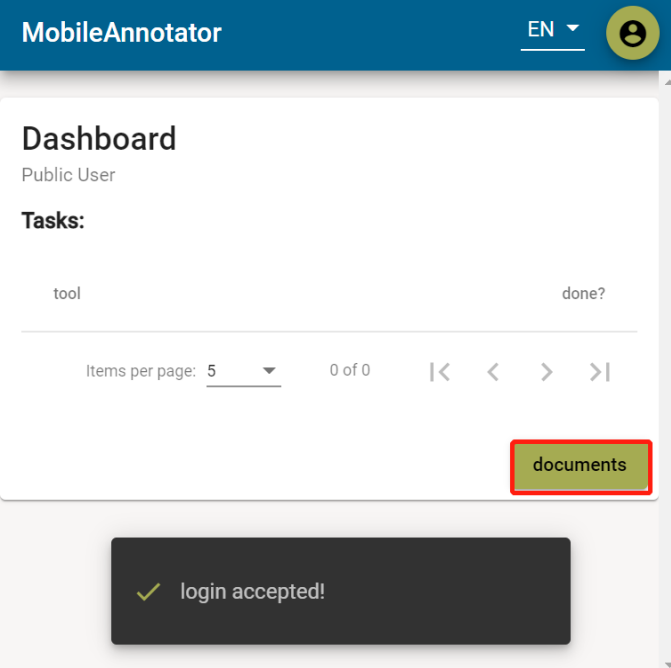

E.g. Login as a guest.

- Step 1. Users without an account can access the annotator with press “guest login”.

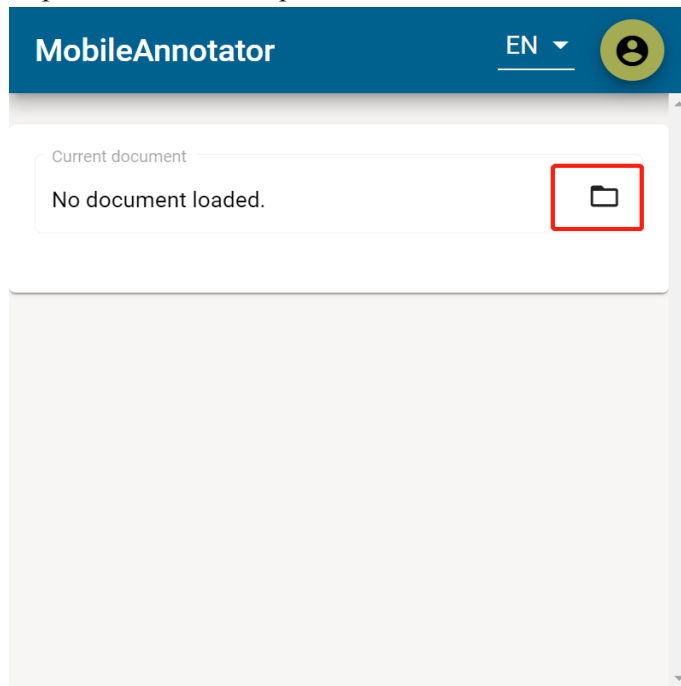

The screenshot shows the MobileAnnotator sign-in interface. At the top, there is a blue header with the text "MobileAnnotator", a language dropdown set to "EN", and a user profile icon. Below the header is a white sign-in form. The form has two input fields: "username \*" and "password \*". Below these fields are two buttons: "login" and "guest login". The "guest login" button is highlighted with a red rectangular box.

- Step 2. At the dashboard page left click the “Document” button.

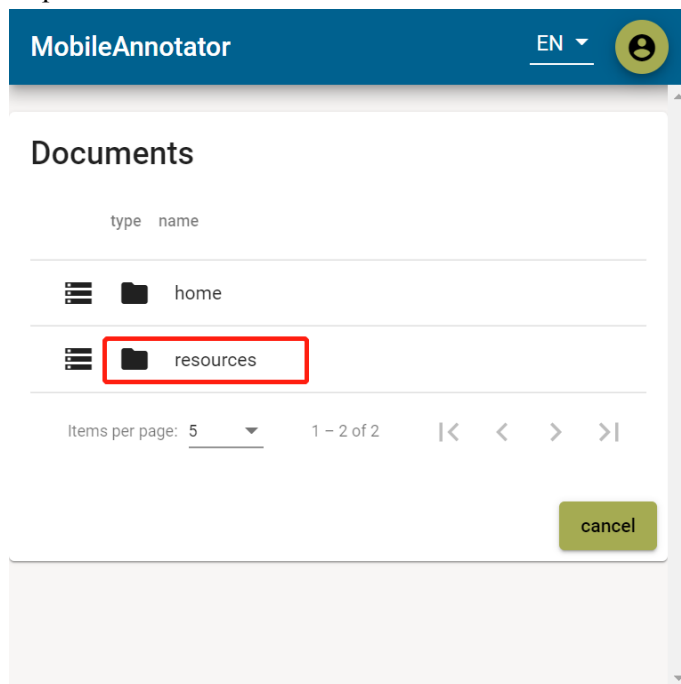

The screenshot shows the MobileAnnotator dashboard. At the top, there is a blue header with the text "MobileAnnotator", a language dropdown set to "EN", and a user profile icon. Below the header, the page title is "Dashboard" and the user is identified as "Public User". Under the heading "Tasks:", there is a table with two columns: "tool" and "done?". Below the table, there is a pagination bar showing "Items per page: 5" and "0 of 0", along with navigation arrows. A button labeled "documents" is highlighted with a red rectangular box. At the bottom of the dashboard, there is a dark grey notification box with a green checkmark and the text "login accepted!".

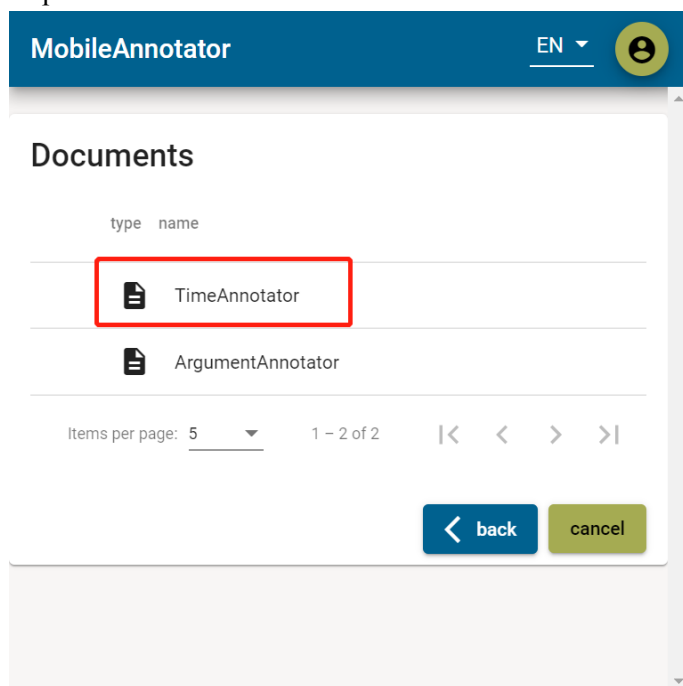

- Step 3 Left click “file” pattern.

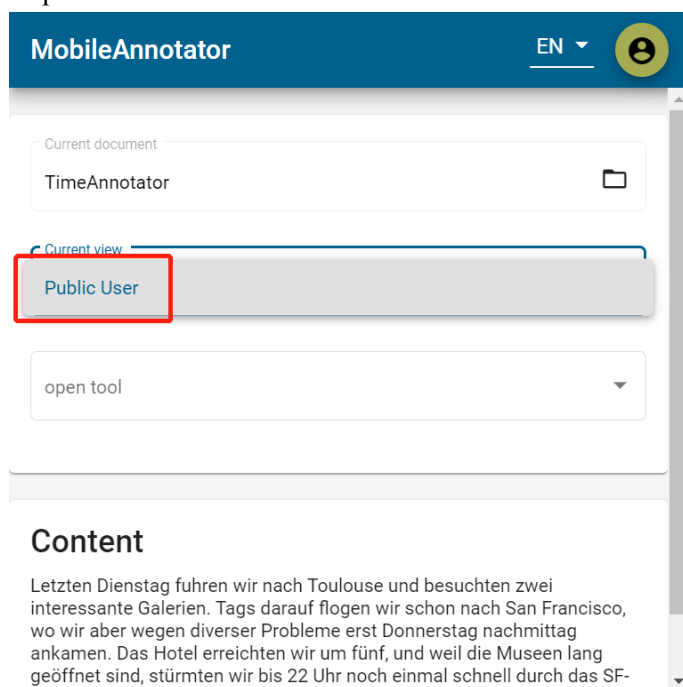

- Step 4. Select “resources”.

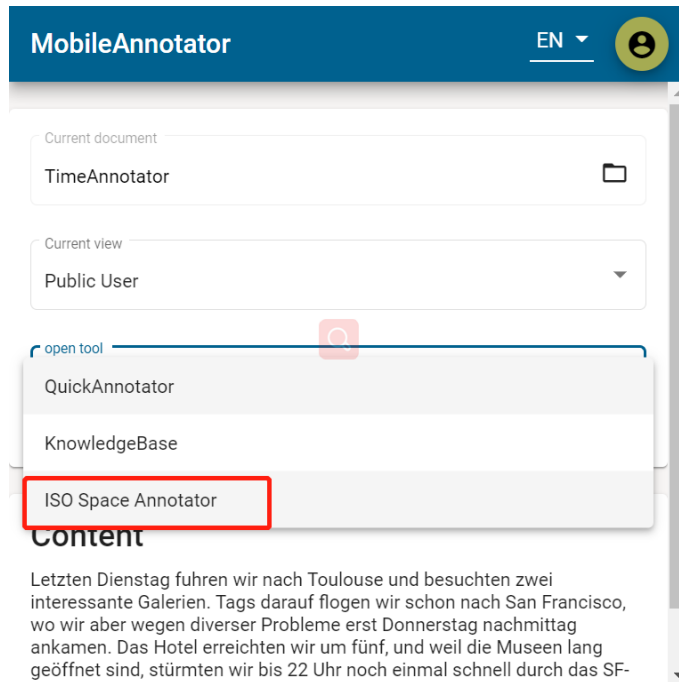

- Step 5. Select “TimeAnnotator”.

- Step 6. Select “Public User”.

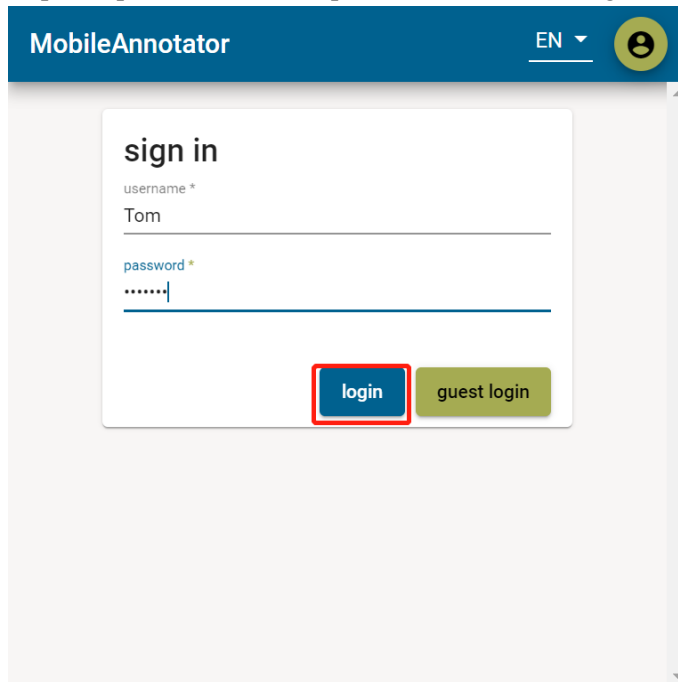

- Step 7. Select “ISO Space Annotator”.

## User with an Account

E.g. Login with an account.

- Step 1. Input username and password, left click “login”.

MobileAnnotator EN

**sign in**

username \*

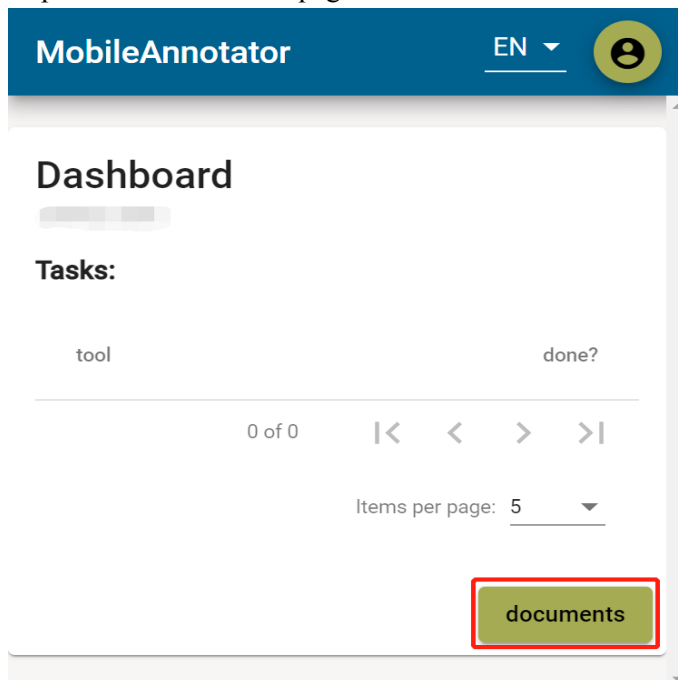

Tom

password \*

.....

**login** guest login

- Step 2. At the dashboard page left click the “Document” button.

MobileAnnotator EN

**Dashboard**

**Tasks:**

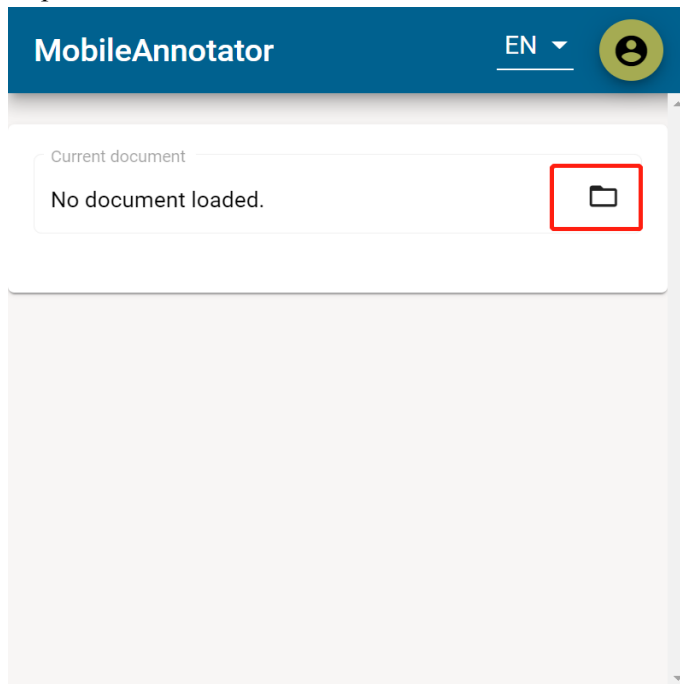

tool	done?
------	-------

0 of 0 |< < > >|

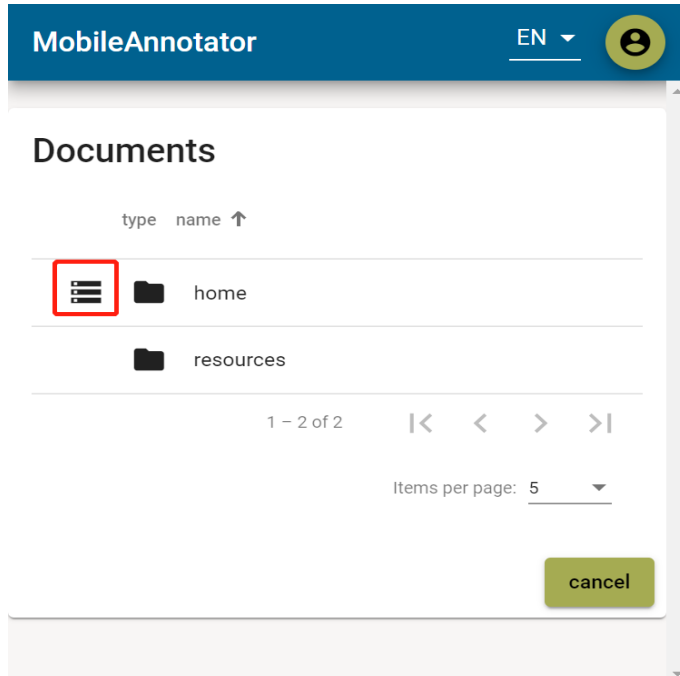

Items per page: 5

**documents**

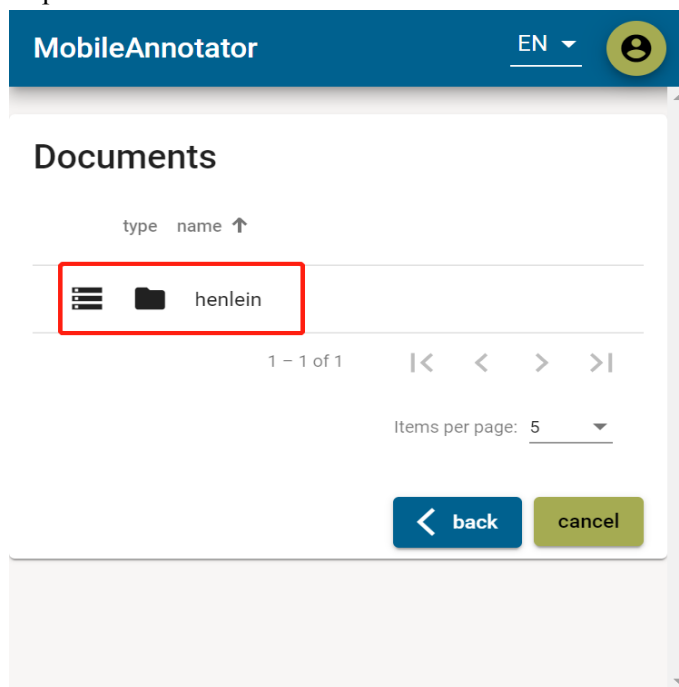

- Step 3. Left click the “file” icon.

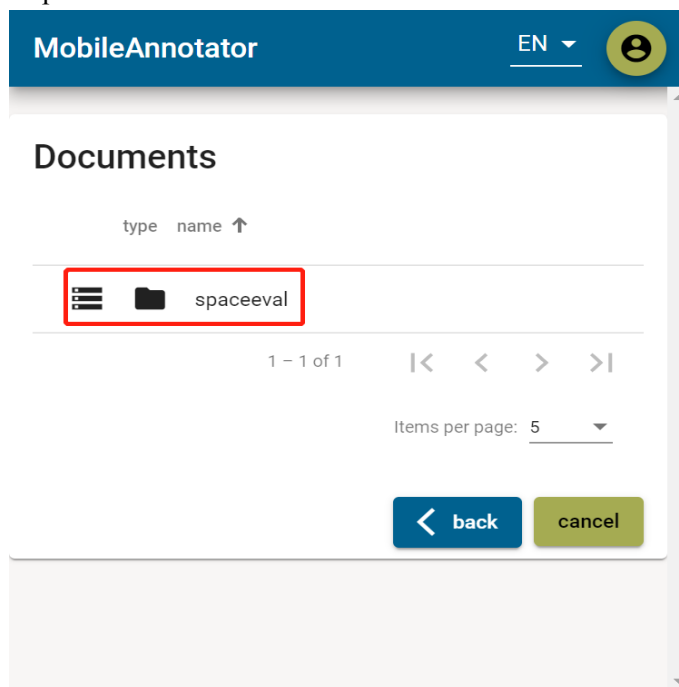

- Step 4. Left click the “list” icon.

- Step 5. Left click the “list” icon.

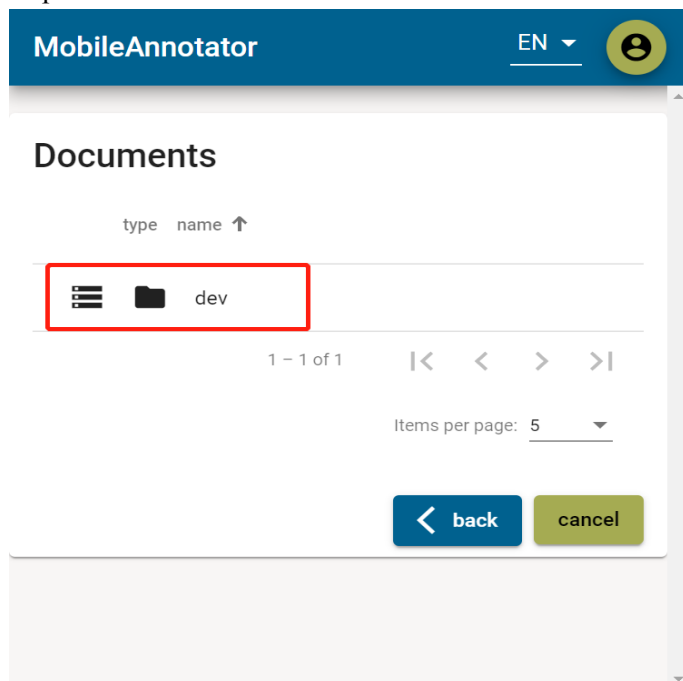

- Step 6. Left click the “list” icon.

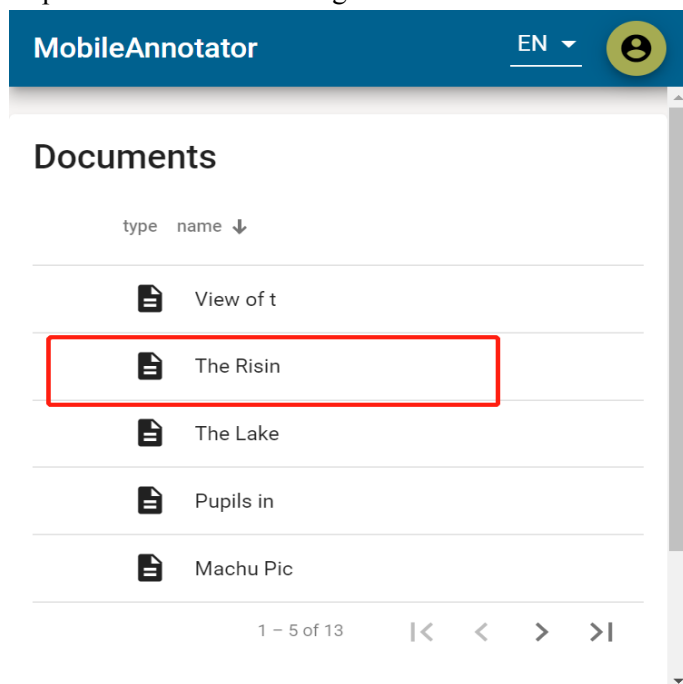

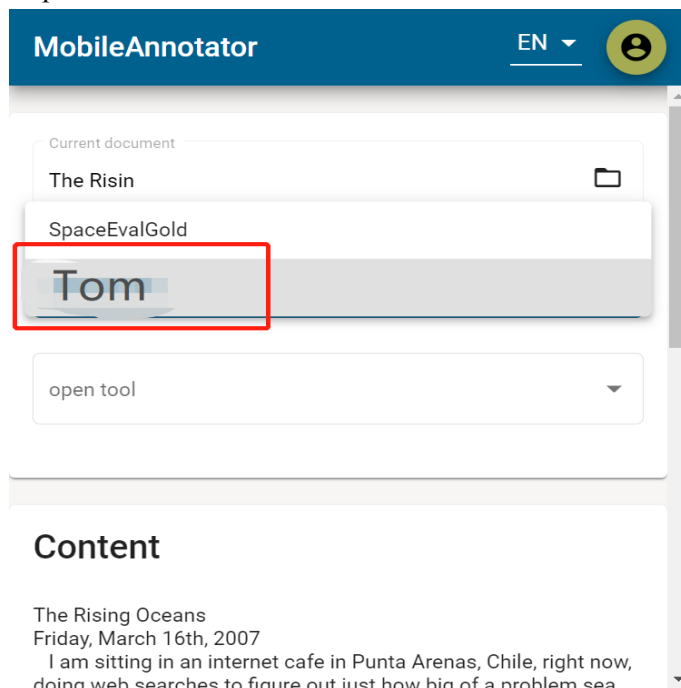

- Step 7. Left click the “list” icon.

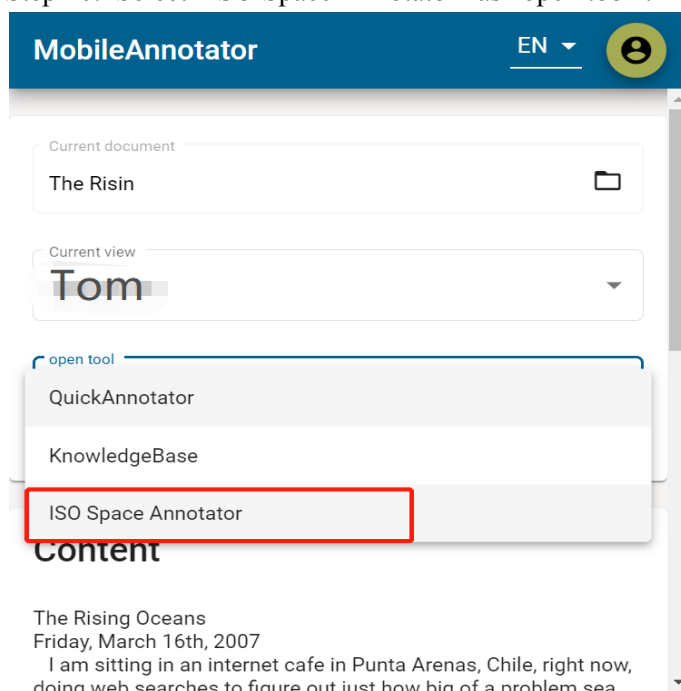

- Step 8. Select the annotating document.

- Step 9. Select user name as “current view”.

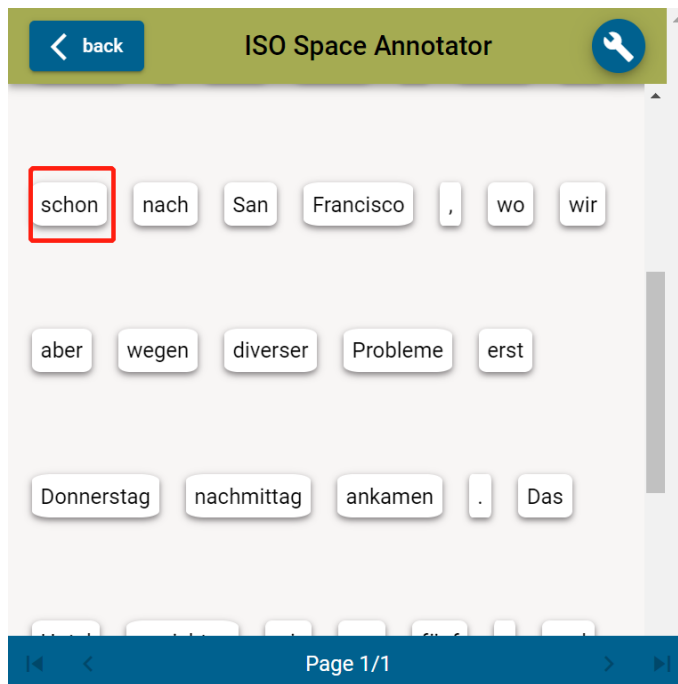

- Step 10. Select “ISO Space Annotator” as “open tool”.

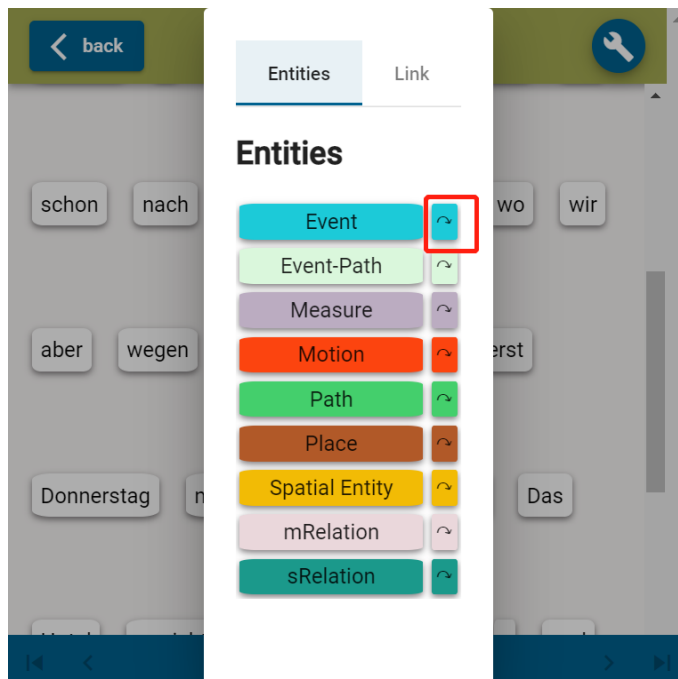

## 2. Add Entities

E.g. add an event entity after “schon”

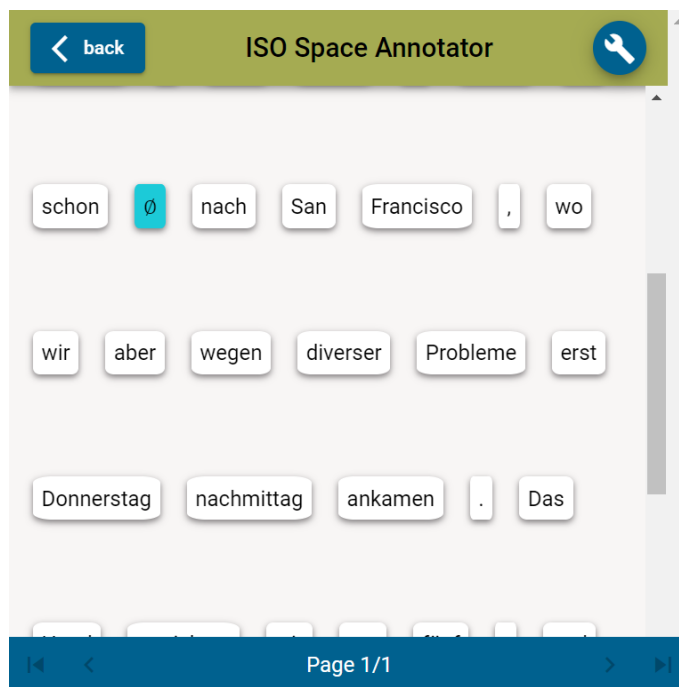

- Step 1. Left click “schon”.

- Step 2 Select the arrow after “Event”.

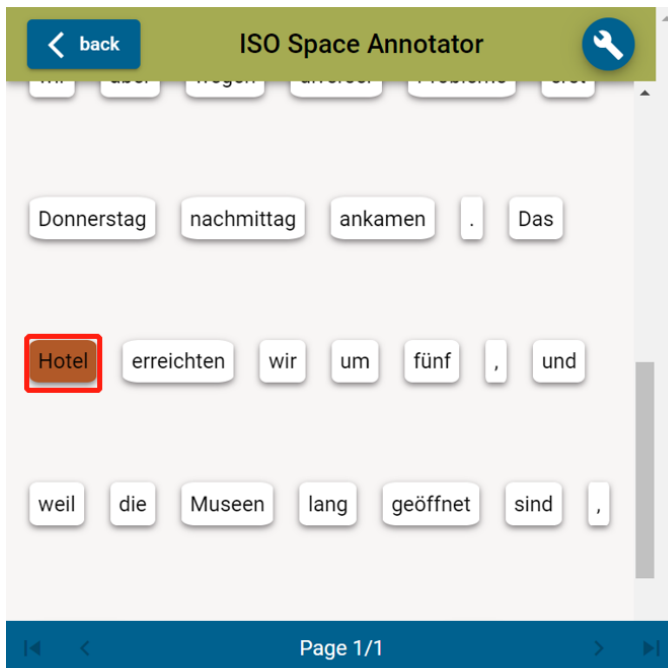

- The result is shown below.

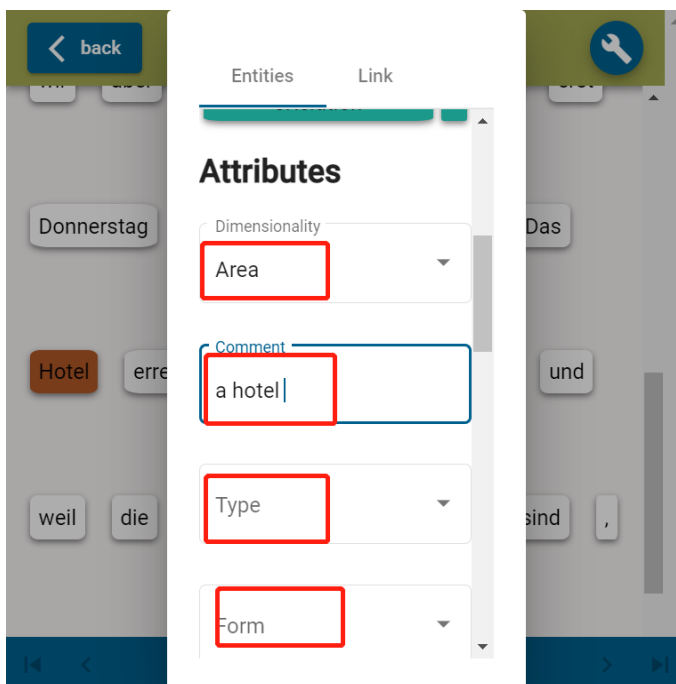

### 3. Add Attributes

E.g. Add attributes for “Hotel”.

- Step 1. Left click “Hotel”.

- Step 2. Scroll down, select “Area” as Dimensionality and input “a hotel” as Comment .
- The result is shown below.

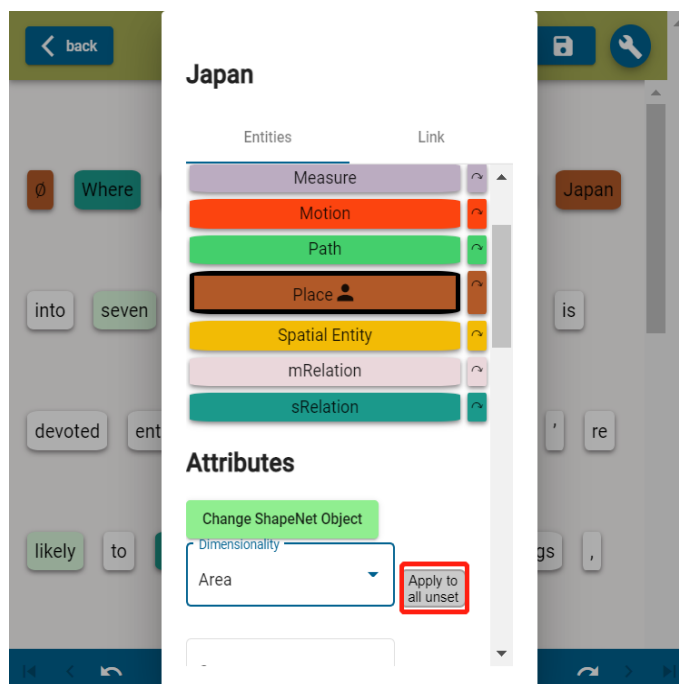

## 4. Apply to All the Unset Attributes

E.g. Apply the Dimensionality in all the unset PLACE entities to "Area".

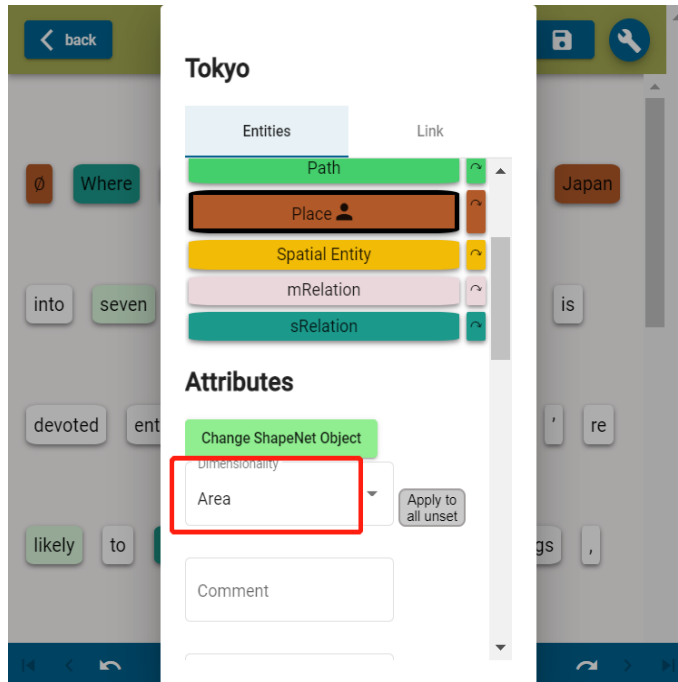

- Step 1. Select “Area” as the dimensionality of Japan.

- Step 2. Select “Apply to all unset”.

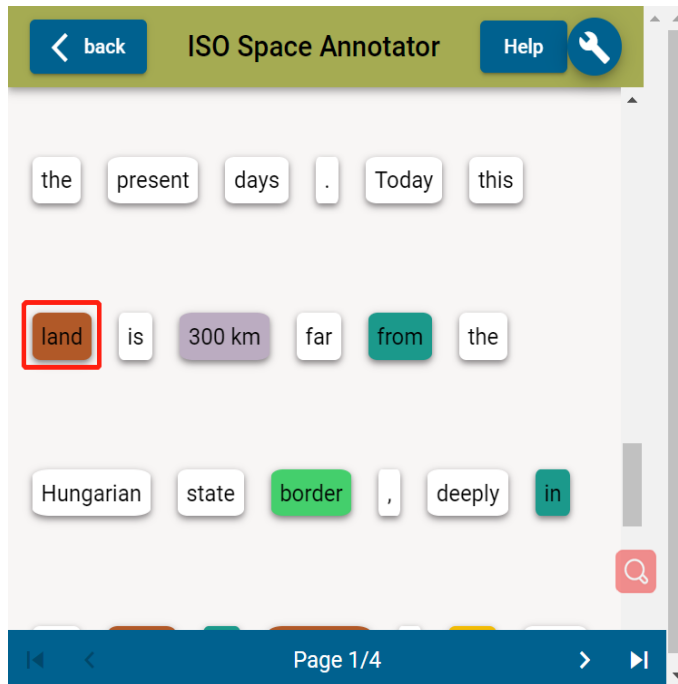

- The result is shown below.
- The dimensionality of Tokyo is also defined as “Area”.

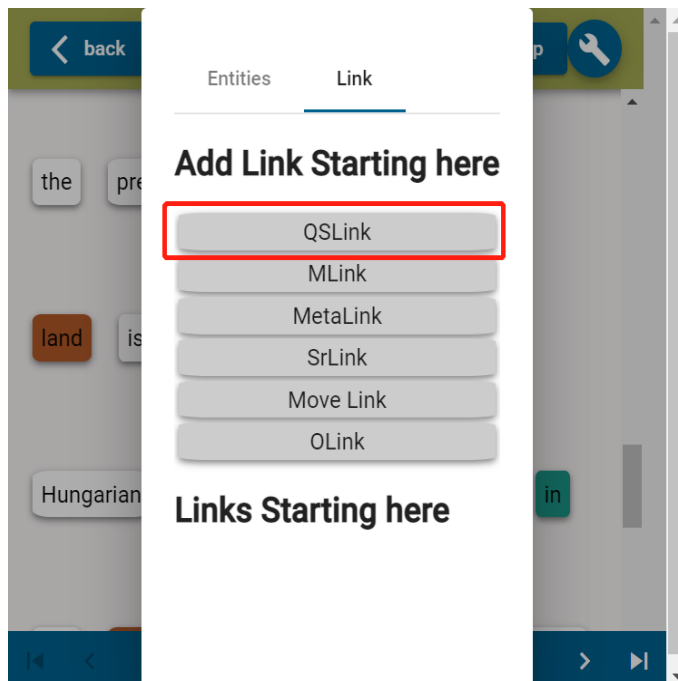

## 5. Add a Link

E.g. Add a QSLink between “land” and “state”.

- Step 1. Left click the start of the link “land”.

- Step 2. Select “QSLink”.

- Step 3. Select the End for QSLink.

- The result is shown below.

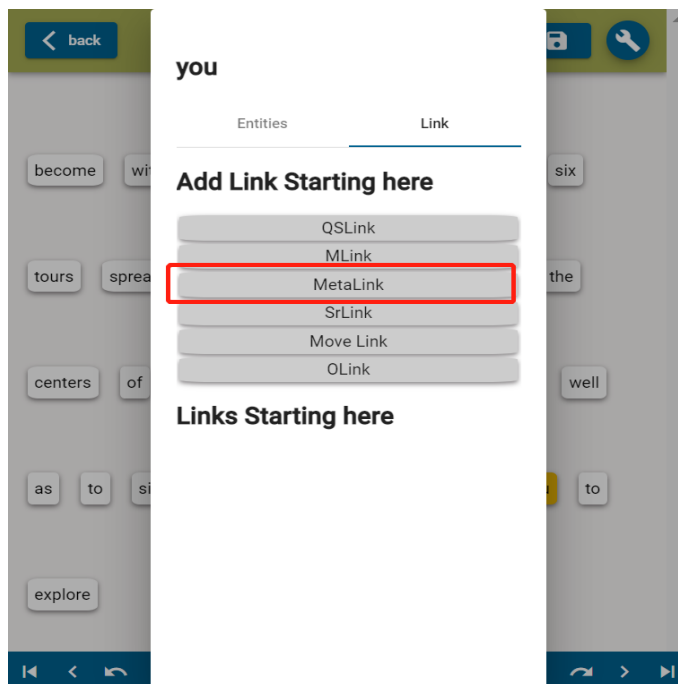

## Add a Cross-page Link

E.g. Add a cross-page MetaLink between “you” and “you”.

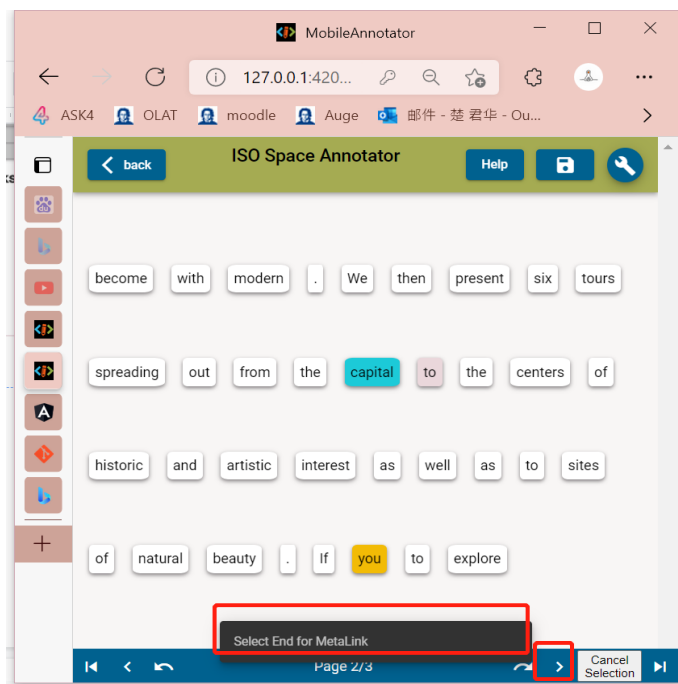

- Step 1. Left click the start of the link “you”.

- Step 2. Select “MetaLink”.

- Step 3. Left click the “next page” button.

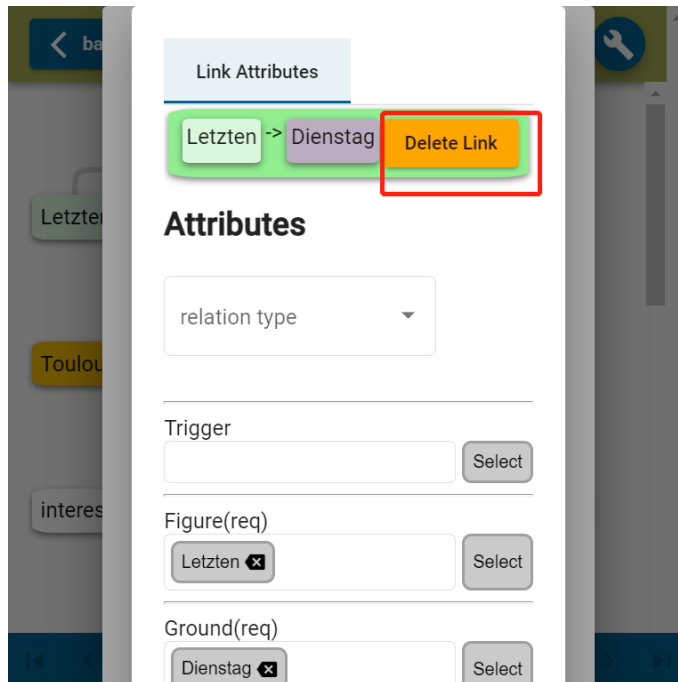

- Step 4. Select the End for MetaLink.
- The result is shown below.

## 6. Delete a Link

E.g. Delete the QSLink between “Letzten” and “Dienstag”.

- Step 1. Left click “Delete Link”.

## 7. Multi Selection

E.g. Select “nach” and “San” as Mids for “Letzten”.

- Step 1. Left click “Letzten”.

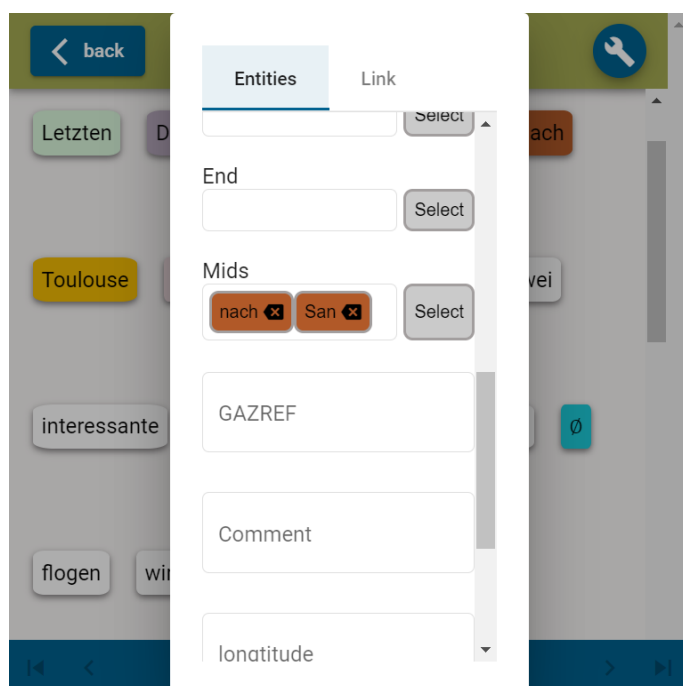

- Step 2. Scroll down and find the “Mids” attribute.

- Step 3. Select “nach” and “San” separately.

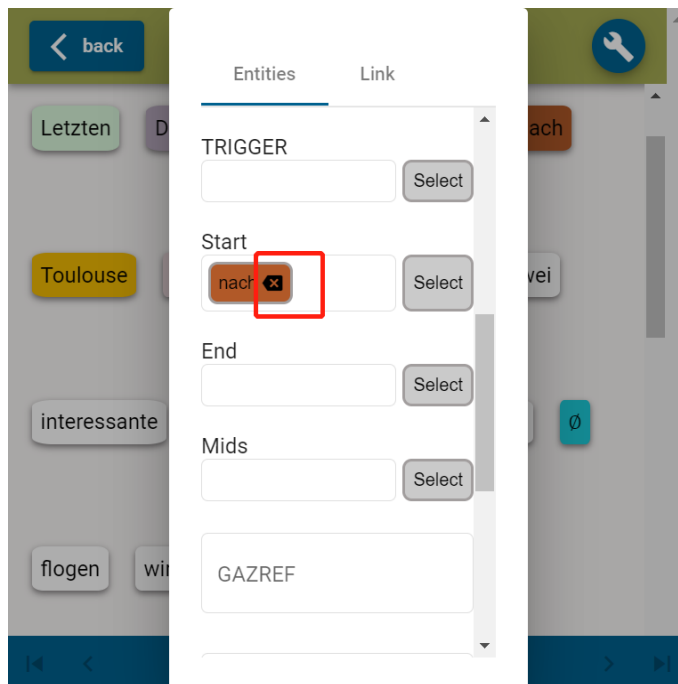

- The result is shown below.

## 8. Delete a Selection

E.g. Delete the start attribute “nach”.

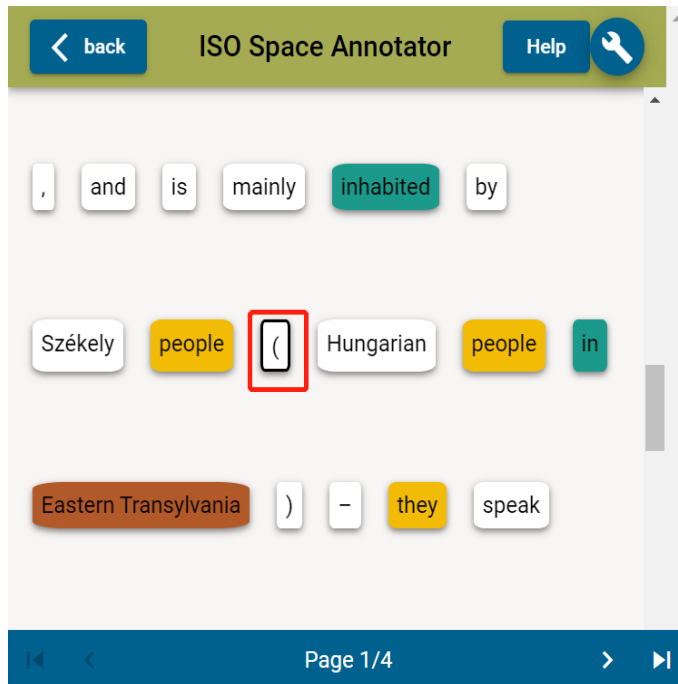

- Step 1. Left click the cross at the end of “nach”.

## 9. Create a Multi Token

E.g. Combine “15”, “-”, “20”

- Step 1. Long left click or left click with Ctrl the start of the multi token “(” .

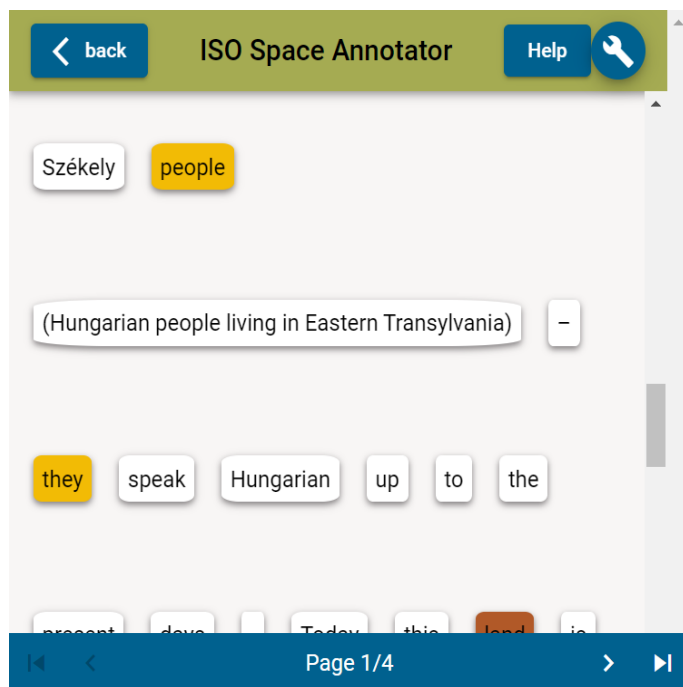

- Step2 Long left click the end of the multi token “)” .

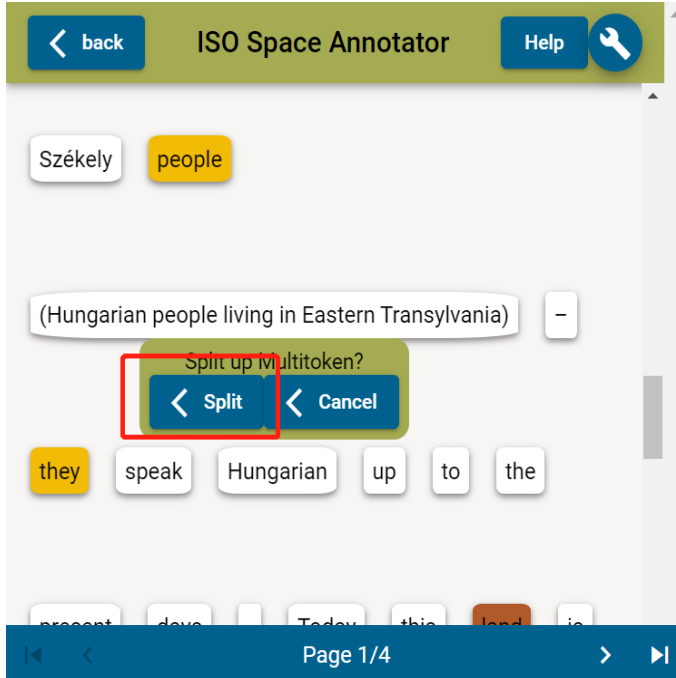

- The result is shown below.

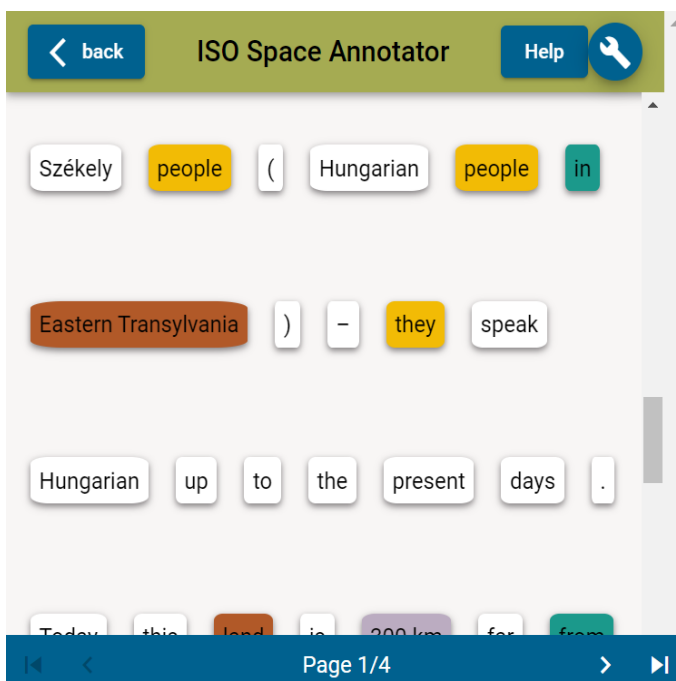

## 10. Split a Multi Token

E.g. Split the multi token “(Hungarian people living in Eastern Transylvania)”

- Step 1. Long left click the multi token “(Hungarian people living in Eastern Transylvania)” .

- The result is shown below.

## 11. Filter View

E.g. Show all the “Motion” attributes.

- Step 1. Left click the “wrench” button at the top right corner.

- Step 2. Select filter.

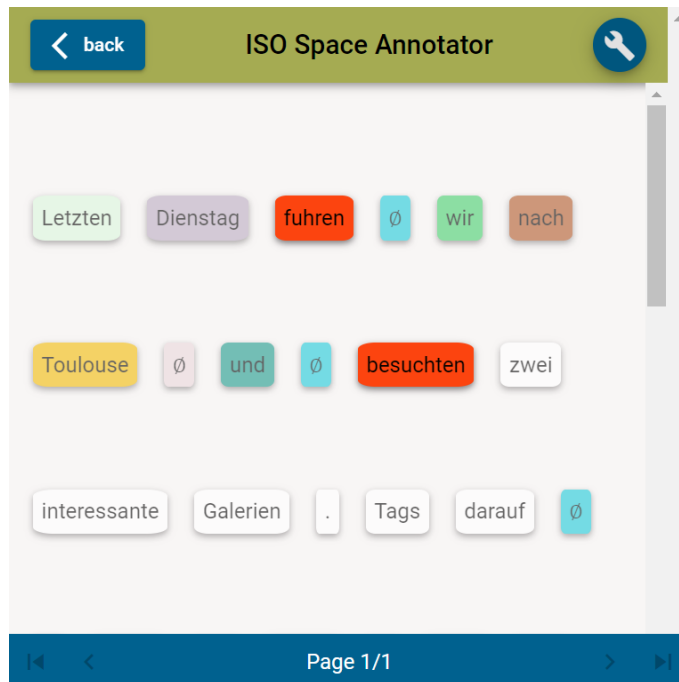

- Step 3. Select “Motion”.

- Step 4. Select “Accept”.

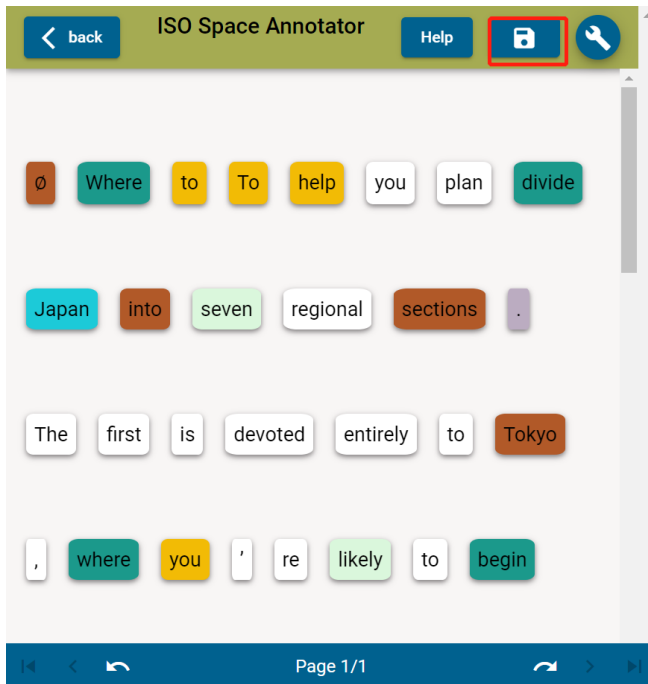

- The result is shown below.

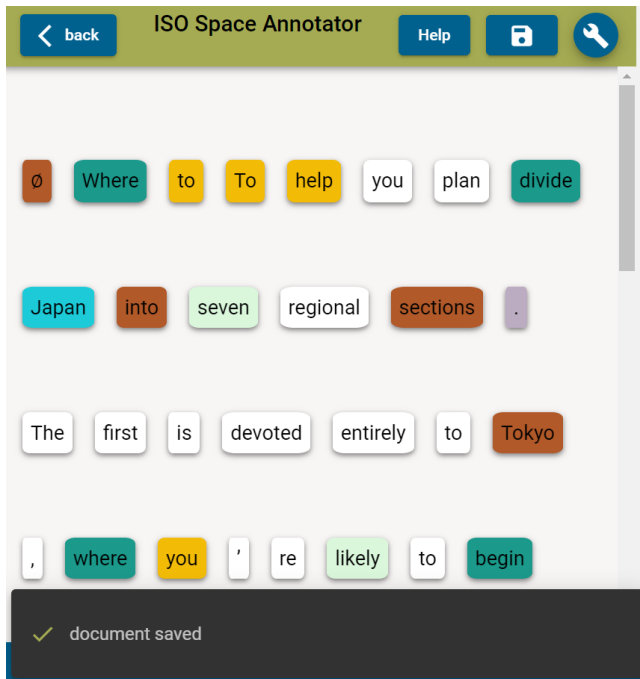

## 12. Save a Document

E.g. Save the document after editing.

- Step 1. Left click the “save” button at the top right corner.

- The result is shown below.

### 13. Undo a Description on the Token

E.g. Undo the description of "Tokyo" and change it from "event" to "place".

- The original description.

- Step 1. Left click the “left arrow” button in the toolbar below.

- The result is shown below.

## Undo the Undefined Description

E.g. Undo the undefined description.

The undefined description.

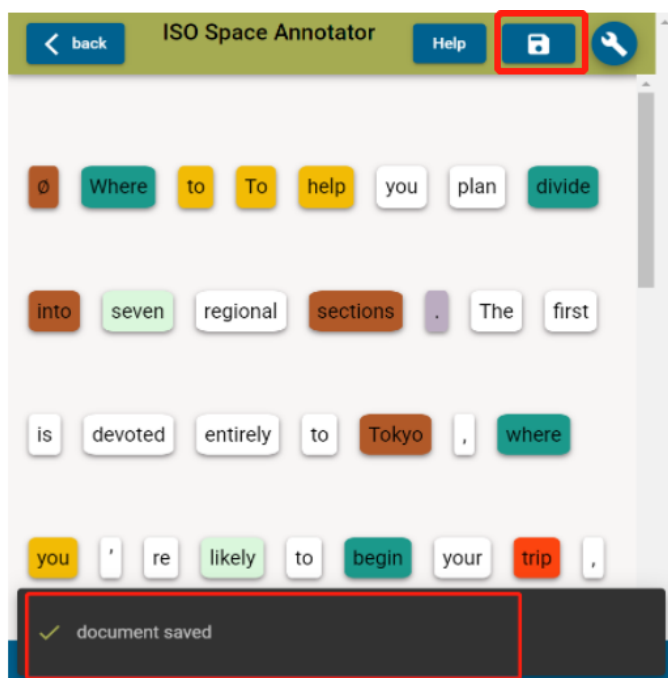

- Step 1. Left click the “left arrow” button in the toolbar below

- The result is shown below, “Japan” disappeared.

- Step 2. Left click the “save” button at the top right corner.

- Step 3. Left click the “refresh” button of the browser.
- The result is shown below.

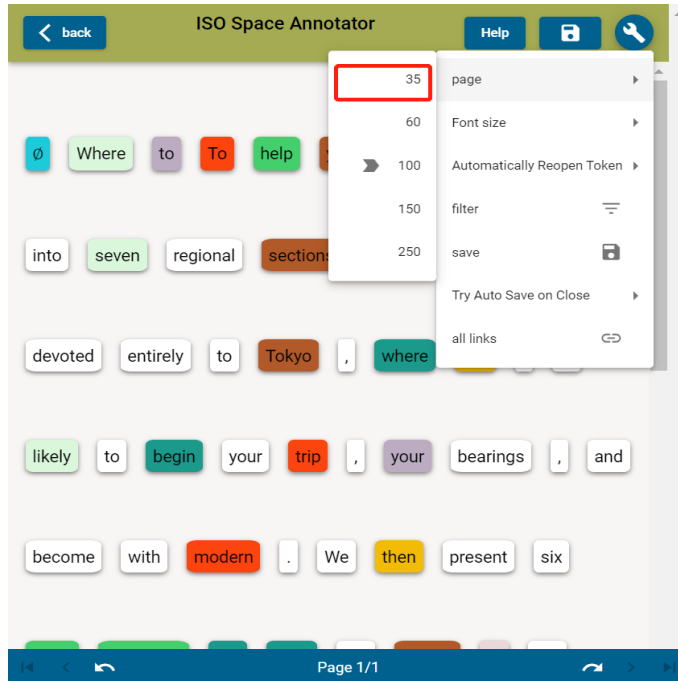

## 14. Display Settings

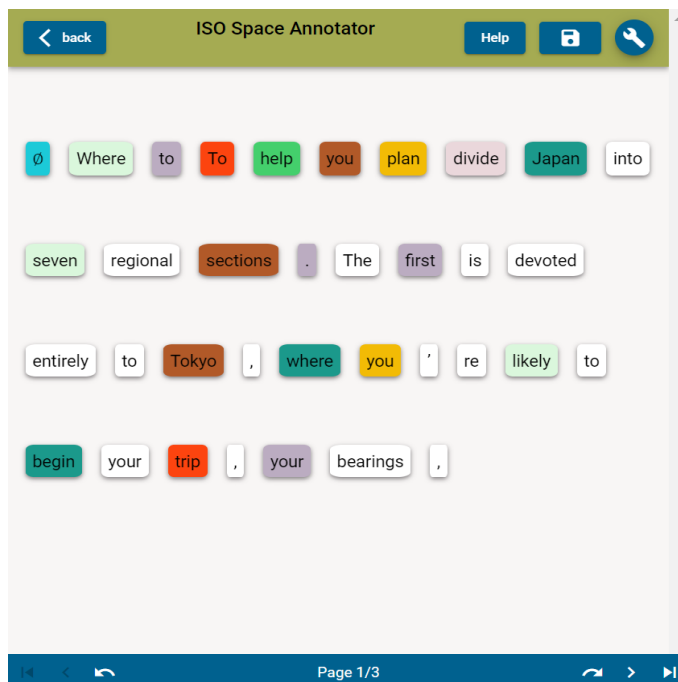

### Change the Displayed Number of Words Each Page

E.g. Change the displayed number of words from 100 to 35.

- Step 1. Left click the “pages” button in the toolbar above, and select “35”.

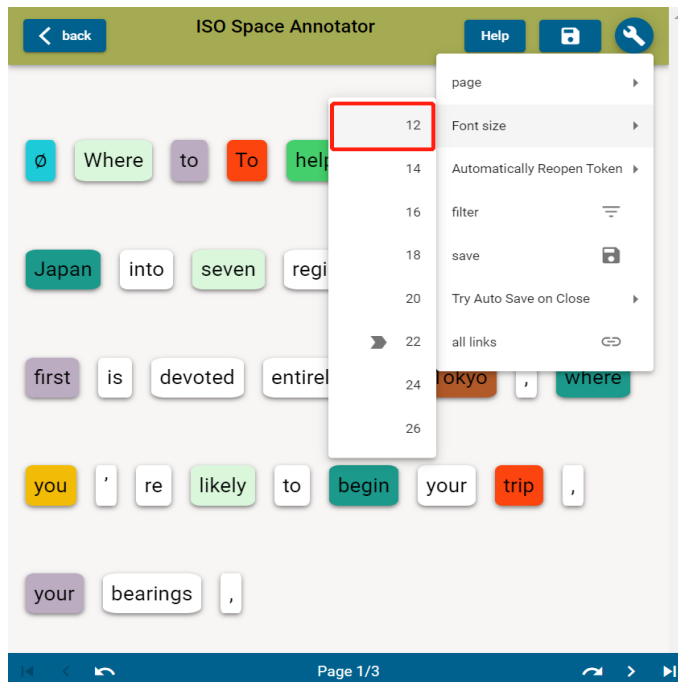

- The result is shown below.

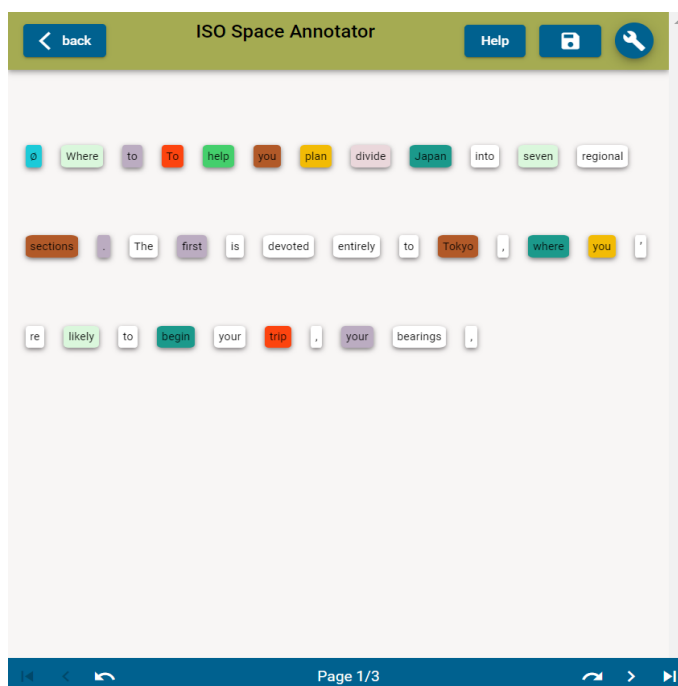

## Change the Font Size

E.g. Change the font size from 22 to 12.

- Step 1. Left click the “Font size” button in the toolbar above, and select “12”.

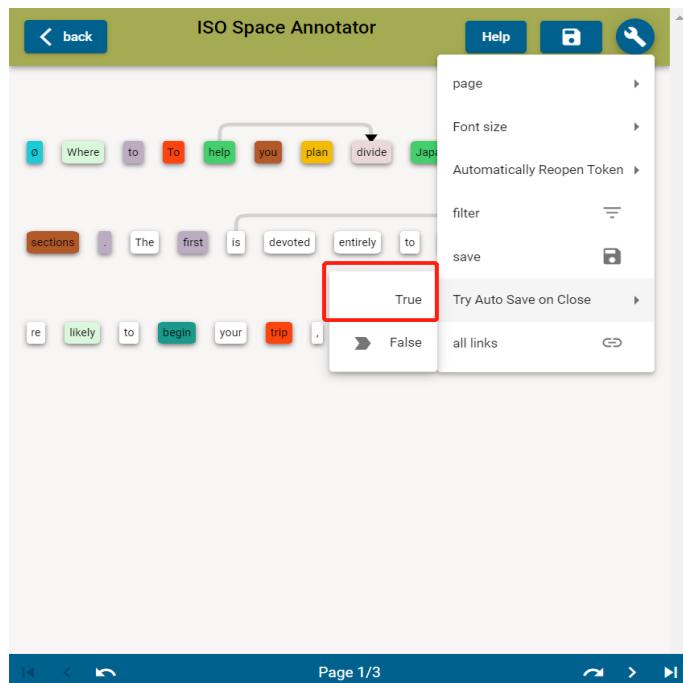

- The result is shown below.

## 15. Convenience Tips

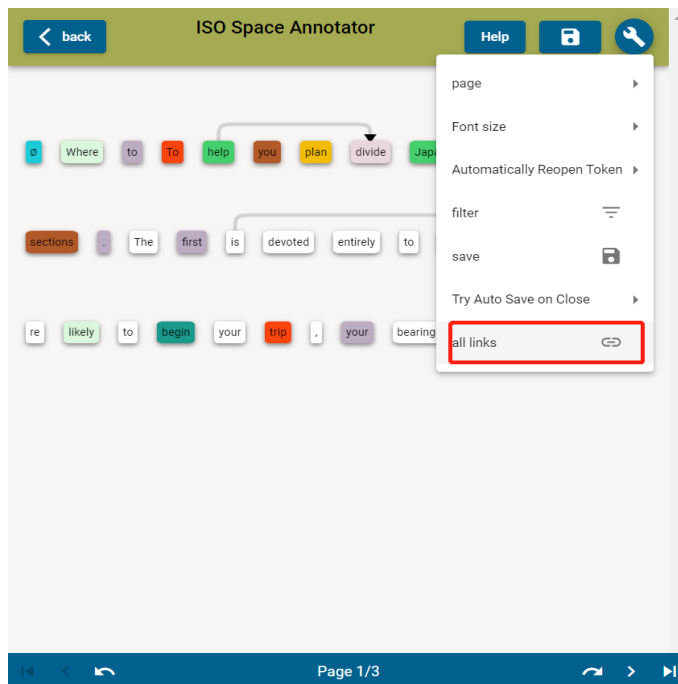

### Save Changes Automatically

- Step 1. Left click the “Try Auto Save on Close” button in the toolbar above, and select “True”.

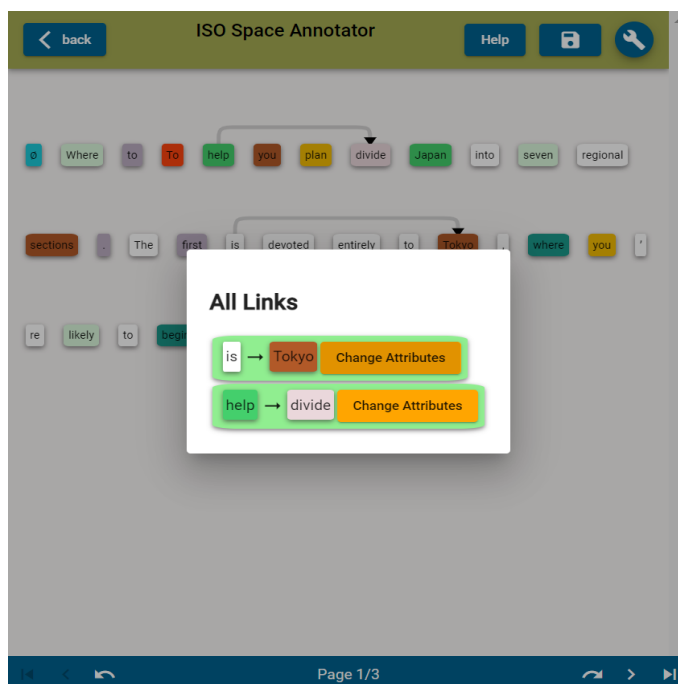

## Show All Links

- Step 1. Left click the “all links” button in the toolbar above.

- The result is shown below.

## Automatically Reopen Token

Tip: This function is to facilitate defining triggers and avoid re-opening the page of attributes manually.

- Step 1. Left click the “Automatically Reopen Token” button in the toolbar above, and select “True”.
